The Hospital of the University of Munich, Germany, is one of the largest and most competitive university hospitals in Germany and Europe. 48 specialized hospitals, departments and institutions harbouring excellent research and education provide patient care at the highest medical level with approximately 10,000 employees.

The **Division of Infectious Diseases and Tropical Medicine** invites applications for a

**Lecturer / Research Fellow in Epidemiology and Medical Statistics (f/m/d)**

The Division of Infectious Diseases and Tropical Medicine at Munich University Hospital is one of the leading centres in Germany for the conduct of clinical trials and observational studies regarding HIV, TB and other poverty related diseases in Africa.

Your primary task will be to work in large-scale observational trials as well as in the clinical development of new drugs and vaccines for poverty related infectious diseases - starting from phase I up to registration. Based in Munich, your job will involve working closely with physicians, data managers, statisticians and epidemiologists in international projects and study teams. The successful candidate will also contribute to our postgraduate teaching program.

**Responsibilities:**
- to plan and design new studies (including sample size calculation, evaluation methods and development of study protocols) in collaboration with the study team
- to plan and control the entire study evaluation and reporting process including development of a statistical analysis plan, data review and preparation of data for analysis (“statistical programming”) and inferential statistical evaluations
- to write scientific publications and study reports in collaboration with the study team
- to provide epidemiological and statistical support to other team members regarding aspects of study design, data preparation, data analysis and reporting

**Essential Skills & Capabilities:**
- MSc or PhD in epidemiology with a strong statistical or programming background
- experience or strong interest in infectious disease research
- in-depth knowledge of Stata (preferred), R and/or SAS
- Willingness to learn and work with Stata
- High degree of autonomy in performing assigned duties
- Good teaming and communication skills

Fluency in English is required; knowledge of German would be an advantage.

Terms and Conditions: Fixed term contract (two years) with a possibility of extension, based on third party funding regulations according to “Wissenschaftszeitvertragsgesetz”. Salary according to German public service scale (TV-L) depending on qualification and experience.

Disabled persons will be preferentially considered in case of equal qualification. Presentation costs cannot be refunded.

Your application – preferably in electronic form – should be directed to:
