The Department of Pediatric Pneumology, Dr. von Hauner Children’s Hospital, Ludwig-Maximilians University Munich, Germany offers a position for a

Fellow in Paediatric Pneumology (m/f)

The position will be open starting from 01.04.2014 (TV-Ärzte). As the lead of the Department of Paediatric Pneumology and the Coordinator of the Project “Orphans Unite: chILD better together – European Management Platform for Childhood Interstitial Lung Diseases” (chILD-EU) we are directing the development of this international consortium. Here, the leading European clinical scientists and paediatric pulmonologists collaborate to assemble and follow children with well-defined rare pulmonary disease entities in a pan-European database and biobank. The project will lead to a better care of patients afflicted by chILD and lead to improved quality of life for children with these incurable diseases.

The position encompasses on the one hand the care of in- and outpatients in the Department; the focus is on long-term care of patients with severe chronic lung disease and chronic respiratory insufficiency. The Department includes a large Cystic Fibrosis clinic, a ward specialised in Pneumology, lung function testing, link to the Munich Lung Transplant Center and the close cooperation with the Paediatric Intensive Care and Interventional Bronchoscopy unit. On the other hand a strong clinical scientific track is implemented, linked to the national and international children’s lung Register for rare disease; assessment of cases, peer review and discussion of special cases with international experts, and the implementation of clinical trials.

We are looking for a colleague with specialisation in Paediatrics or nearly finished and first experience in Paediatric Pulmonology.

Our requirements:
A doctoral degree, interest in scientific research and the willingness to pursue a translational/clinical-research project (not laboratory).

We offer:
There is a full training authorisation. On offer is a structured and comprehensive training in a friendly and dynamic team within a powerful center of the highest level and the opportunity of clinical-scientific work.

Disabled people having the same qualification will be privileged. Travel costs to interview cannot be covered due to University rule.

Please send your application via email to Prof. Dr. Matthias Griese. E-mail: Matthias.Griese@med.uni-muenchen.de
