6. Münchener Kraepelin-Symposium
Understanding and treating cognitive impairment and depression in schizophrenia and affective disorders

Saturday, 6th October 2018

Department of Psychiatry and Psychotherapy,
Medical Center of the University of Munich

Supported by the Deutsche Forschungsgemeinschaft (DFG)
Dear colleagues,

It is a great pleasure to invite you to the 6th Kraepelin Symposium on Saturday 6th of October at the Department of Psychiatry and Psychotherapy, Ludwig Maximilians University of Munich.

This symposium was initiated in 1997 by Hans-Jürgen Möller in order to acknowledge the scientific and clinical excellence of Emil Kraepelin, chairman of the Department of Psychiatry and Psychotherapy from 1904 to 1922.

The current symposium gives an overview of state of the art in evidence-based psychological and pharmacological treatment options focusing on cognitive impairment and depression in order to optimise treatment outcome in schizophrenia and affective disorders. Since this is an important, however, unfortunately also somewhat neglected field of psychiatry, our symposium aims to bring together internationally renowned researchers from the US and Europe to present their knowledge in this field. With combined forces we hope to improve the prevention of cognitive dysfunction and symptom exacerbations as well as to increase social recovery in young up to older persons.

We are looking forward to welcome you to Munich to the 6th Munich Kraepelin Symposium. We sincerely hope that you will be able to enjoy excellent topics and improve your knowledge regarding cognitive dysfunction and depression in schizophrenia and affective disorders.

Dr. Annette Schaub

Prof. Dr. Peter Falkai
8.00 - 8.40  Registration and welcome coffee
8.45  P. Falkai
Opening remarks: Integrative aetiopathogenetic models and therapeutic pathways: Changes in the last 20 years

**Setting the stage: Severe mental illness in 2018 - where are we?**

Chair: S. Vinogradov / A. Schaub

9.00 – 9.30  P. Falkai
Psychiatric disorders and its importance for the health care system in Germany and the U.S. being the basis for this symposium

9:30 – 10.00  F. Seemüller
Closing the distance between schizophrenia and bipolar disorder: Distinguishing features and similarities

10.00 - 10.30  K. Nuechterlein
The Vulnerability-Stress-Coping Model as a basis for interventions and outcome

10.30 - 11.00  Coffee break

**Psychological interventions to improve outcome in schizophrenia and affective disorder**

Chair: D. Miklowitz / K. Nuechterlein

11.00 – 11.30  C. Torrent
Functional remediation and its effects in bipolar disorder

11.30 - 12.00  K. T. Mueser
Illness management in schizophrenia and bipolar disorder including the role of trauma for psychoses

12.00 - 12.30  A. Schaub
Cognitive psychoeducational group therapy reducing depression and the rate of rehospitalisation in schizophrenia and affective disorders

12.30 – 13.30  Lunch
Evidence-based psychological and pharmacological options to improve outcome in schizophrenia and affective disorder

Chair: K. T. Mueser / N. Koutsouleris

13.30 – 14.00  M. Hautzinger
Psychotherapy of affective disorders: Current status and recent developments

14.00 - 14.30  C. Schüle
Psychopharmacotherapy of affective disorders: Current status and recent developments

14.30 – 15.00  A. Hasan
Cognitive deficits and depressive symptoms in schizophrenia – what’s the guidelines recommendation?

15.00 - 15.30  S. Leucht
Evidence-based medicine based on Cochrane-Meta-analysis: acute therapy, relapse prevention and supported withdrawal from medication.

15.30 - 16.00  Coffee break

Prevention of cognitive dysfunction and symptom exacerbation in schizophrenia

Chair: S. Leucht / M. Hautzinger

16.00 - 16.30  N. Koutsouleris / D. Dwyer
Using neurocognitive data to predict psychosis and bipolar disorder at single subject level

16.30 - 17.00  S. Vinogradov
New strategies in changing brains and improving outcome in schizophrenia - how does it work?

17.00 - 17.30  D. Fowler
How to increase the rate of social recovery in patients with first episode psychosis in early intervention services.

17.30 - 18.00  D. Miklowitz
What is the state of art in psychosocial interventions for bipolar disorder with adolescents?

18.00 - 18.20  A. Schaub
Closing remarks
List of speakers

Dominic Dwyer, Ph.D., Department of Psychiatry and Psychotherapy, LMU, Nußbaumstr. 7, D-80336 Munich.
