

Invitation to the 12th Spring Meeting

Special focus on

Tissue Engineering Regenerative Medicine Xenotransplantation

*complementing strategies
to overcome organ failure*

11.-12.05.2017, BERLIN

Invited Speakers:

Carlijn Bouten (Eindhoven TU/e, NL)
*In situ cardiovascular tissue engineering:
harnessing the host response to degradable
synthetic scaffolds*

Matthias Gunzer (University Hospital Essen, GER)
*Precise quantification of organ function
in health and disease by advanced optical
imaging*

Nik Klymiuk (LMU München, GER)
*Transgenic pigs as donors for islet
cell transplantation*

Kai Schmidt-Ott (Charité Berlin, GER)
*Programming stem cells to kidney
cells: the developmental perspective*

Stephen Strom (Karolinska Institutet, S)
*Cellular therapy of liver disease-
from hepatocytes to stem cells*

**Abstracts are invited covering the following topics in solid ,
tissue and bone marrow transplantation:**

- ...Immune Modulation
- ...Immune Monitoring
- ...Transplantation Tolerance
- ...Graft Immunogenicity
- ...Immunotherapy
- ...Histocompatibility

Where?

Charité Campus Virchow Clinic
Berlin-Brandenburg Center for
Regenerative Therapies (BCRT)
Föhrer Straße 15, 13353 Berlin

When?

May 11th, 2017: 13:00-19:00h
May 12th, 2017: 09:00-14:00h

Registration:

Please send attached word-document
to transplant-immunologie@charite.de
(no registration fee)

Abstracts:

Deadline: 31st March, 2017
Format: 1 A4 page max.
Language: English

Social Event:

Come together party on May 11th,
Starting at 8.00 p.m. (place will be announced)

Organisation:

Katja Kotsch (Berlin)
Martina Seifert (Berlin)
Reinhard Schwinzer (Hannover)
