

Observational trial

Patients included: 502 (+10 compared to April 2016)

We reached the 500 patients mark!

Completed, peer reviewed cases: 286

GOALS: 1. build more regularly working peer-reviewer teams!
2. Fill in follow up visits !

Observational trials

We had a great and very successful meeting at Edinburgh University June 2 and 3, 2016!

Hosted by Steve Cunningham, Morag and Fiona, 20 superb cases and excellent talks on childhood interstitial lung disease were presented to many Trainees as well as Senior Investigators from several countries.

Observational trial

Interventional trials

A) In Germany: remember to include all suitable children into the interventional trials:

- 1. New EAA**
- 2. Newly diagnosed or known cases of chILD and need for hydroxychloroquine**
- 3. Patients with stable chILD course over the last months and a wish to stop HCQ treatment**

B) All other countries: prepare your center for the interventional trials!
